Summary

BI & Data Engineering | Analytics & Data Visualization with 10+
years in designing and developing analytical systems, data
integration, and reporting solutions.

--- Key Skills and Experience ---

Analytical Systems Development: Designing, developing, and
maintaining OLAP cubes (MS SSAS) and Power BI semantic
models.

SQL & Database Management: Writing optimized T-SQL queries,
stored procedures, and views in SQL Server; working with Azure
Data Warehouse.

ETL & Data Integration: Building scalable ETL pipelines with SSIS
& Azure Data Factory, optimizing data flows, and architecting data
warehouses.

Reporting & Dashboards: Creating insightful reports and dashboards
with Power BI, SSRS, and DevExpress, integrating KPIs and
advanced analytics.

Power BI & Embedded Analytics: Developing interactive Power BI
solutions, embedding reports into external apps, and utilizing Power
BI REST API & Client API.

Programming & Automation: Hands-on experience with C#,
PowerShell, Power Query M, DAX, Python, CosmosDB, MS
Synapse, and Azure tech stack.

BI Performance & Optimization: Monitoring and fine-tuning BI
systems, including Power BI Premium & Embedded.

Security & Access Control: Implementing Row-Level Security (RLS) and managing security models in Power BI.

Cloud & Big Data: Working with Azure Databricks, Azure Data Factory, and leveraging Azure services for scalable data solutions.

BI Project Management: Leading end-to-end BI solution development - from ETL to analytical dashboards.

Passionate about data-driven insights, automation, and scalable BI architectures. Always exploring new ways to optimize analytics workflows and enhance decision-making.
